

Focal Dystonia treatments and rehabilitation - Workshop Save the Date - Dec. 10, 2021 13.00

AMADYS, French member of DYSTONIA EUROPE, and Hospital Adolphe de Rothschild Foundation, neurology service, Parkinson unit, Paris, organize a multi-disciplinary and interactive workshop on focal dystonia, treatments and rehabilitation.

Thanks to volunteer patients, dystonia professionals will explain and detail their diagnosis and care protocols. RoundTable discussions after each case.

This workshop is proposed for participants on site and **on line**. Online event will be simultaneously translated from French to English. A replay will be available afterwards.

Reserved for health care professionals.

Subscribe and learn more about dystonia! Free event.

Objectives:

- Medical and rehabilitation decisions in focal dystonia
- Interest of therapeutic activities mix and adjustment (botulinum toxin injections and exercises programs)

Program:

- Follow a volunteer patients' consultation and multi-disciplinary team thoughts (neurologists and rehabilitation specialist),
- Movement and postural disorders: clinical assessment, muscular tracking (ultrasound)
- Therapeutic options (target muscles to inject, exercises programs) for each case
- Interactive discussions between participants and speakers

From 13.00 to 17.00 (incl. 30mn break)

- Introduction by E. Ponsel, AMADYS President and DYSTONIA EUROPE Vice-President
- Cases studies: multi-disciplinary consultations and therapeutic options proposals/demonstrations (botulinum toxin injections, exercises...) by the neurologists: Dr S. Sangla, Dr N. Patte-Karsenti, Dr J.M. Trocello and the physiotherapist Dr J.P. Bleton, on volunteers' patients suffering from cervical dystonia and writer's cramp
- Round table and chats with the speakers after each case, questions from the participants in the conference room and on line, reported and moderated by Dr Ch. Vial.

Speakers:

Dr Jean-Pierre Bleton, physiotherapist, Dr Sophie Sangla, Dr Nathalie Patte-Karsenti, and Dr Jean-Marc Trocello, neurologists.

Round table moderator for online and onsite participants: Dr Christophe Vial, neurologist, AMADYS Scientific Committee Chairman.

Technical organizer: Dr Laurent Goetz, PhD, neurophysiologist.

With the kind participation of volunteer's patients.

Target audience: Rehabilitation specialists, neurologists, GP, students, all health care professionals interested in dystonia and movement disorders.
